Data Management Maturity (DMM)SM Assessment

Sandhill can help your organization understand what capabilities you will need to achieve a comprehensive data architecture. Understanding the capabilities is a good first step, but you will also need to determine your organization's competency to achieve higher levels of performance in data management.

Sandhill offers a DMMSM Assessment, incorporating a strategy which centers on the improvement of an organization's data management process. Sandhill DMMSM is the key to bringing an effective return on opportunity for data governance efforts, and delivering trusted reliable data.
